

SOLAR STATIONS

SENSOR MODULE TYPE SM-DDT

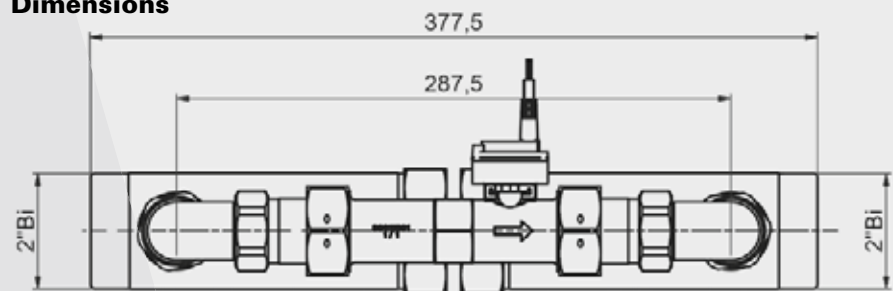

Product description

Sensor module for measuring flow, pressure and temperature, for system monitoring and heat quantity metering. The sensor module consists of 2 sensor sections incl. pressure and flow sensor with pipe manifold preassembled ready for installation. The sensors may be connected to the TiSUN Duplex Basic or Multiplex Advanced solar control unit.

Specifications

Item no.	1510431
Pipe dimension	2"
Sensors	Pressure sensor VPS 0-10 VFS 10-200 flow sensor (see flow sensor section for details)

Dimensions

CASCADING BASIC MODULE SG-GM 100 AND EXPANSION MODULE SG-EM 100 + SENSOR UNIT
